## Question 1

0/1 pt 3 19

| Ages  | Number of students |
|-------|--------------------|
| 15-18 | 10                 |
| 19-22 | 5                  |
| 23-26 | 6                  |
| 27-30 | 6                  |
| 31-34 | 7                  |
| 35-38 | 6                  |

Based on the frequency distribution above, find the relative frequency for the class with lower class limit 15

Relative Frequency = \_\_\_\_\_ %

Give your answer as a percent, rounded to one decimal place

## Question 2

0/1 pt 3 19

Data was collected for a sample of organic snacks. The amount of sugar (in mg) in each snack is summarized in the histogram below.

What is the sample size for this data set?

$n =$  \_\_\_\_\_

## ● Question 3

0/1 pt 3 19

| Ages  | Number of students |
|-------|--------------------|
| 15-18 | 8                  |
| 19-22 | 8                  |
| 23-26 | 6                  |
| 27-30 | 8                  |
| 31-34 | 4                  |
| 35-38 | 8                  |

A total of 42 people were sampled. Based on the frequency distribution above, find the degrees in a pie graph for the class with lower class limit 19

Degrees in this section of a pie graph =  Give answer to nearest whole number.

## ● Question 4

0/1 pt 3 19

The class ranks of a very small high school with 20 students are shown in the table below.

|    |
|----|
| Fr |
| Fr |
| Fr |
| So |
| So |
| So |
| So |
| Sr |
| Jr |
| Sr |
| So |
| Fr |
| Fr |
| Fr |
| Jr |
| Jr |
| Sr |
| Sr |
| Sr |
| Fr |

a) Since data were collected for 

?

Select an answer

 variable(s), the correct graph to make is a 

Select an answer

 .

b) Complete the frequency/relative frequency table.

| Class Rank | Frequency   | Relative Frequency |
|------------|-------------|--------------------|
| Fr         | <div></div> | <div></div>        |
| So         | <div></div> | <div></div>        |
| Jr         | <div></div> | <div></div>        |
| Sr         | <div></div> | <div></div>        |

c) Which of the following is the correct bar chart for the given data?

d) Which of the following is the correct pie chart for the given data?

● Question 5

 0/1 pt  3  19

---

In a study of fourth, fifth and sixth graders, the following data were collected on their gender and their primary goal.

|               | Primary Goal    |                |                    |            |
|---------------|-----------------|----------------|--------------------|------------|
| Gender        | Good Grades (G) | Popularity (P) | Good at Sports (S) | Row Totals |
| Male (M)      | 120             | 51             | 59                 | 230        |
| Female (F)    | 134             | 87             | 31                 | 252        |
| Column Totals | 254             | 138            | 90                 | 482        |

a) Since data were collected for   variable(s), the correct graph to make is a .

b) Which of the following is the correct graph for the above data with Primary Goal grouped by Gender.

● Question 6

0/1 pt 3 19

The park service records the number of reported rattle snake sightings on Bald Mountain Trail and Camel Back Trail. The data gives rise to the following two bar graphs.

**Rattlesnake Sightings on Bald Mountain Trail**

**Rattlesnake Sightings on Camel Back Trail**

Use the bar graphs to fill in the contingency table below.

**Reported Rattle Snake Sightings**

|               | Year                 |                      |                      |                      |
|---------------|----------------------|----------------------|----------------------|----------------------|
| Trail         | 2016                 | 2017                 | 2018                 | Total                |
| Bald Mountain | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |
| Camel Back    | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |
| Total         | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |

● Question 7

0/1 pt 3 19

After surveying some of the classmates about their cola preferences, Vanessa came up with the following data set:

|        |        |        |        |        |
|--------|--------|--------|--------|--------|
| Coke   | Pepsi  | Coke   | Shasta | Shasta |
| Shasta | Shasta | Shasta | Shasta | Coke   |
| Coke   | Pepsi  | Pepsi  | Pepsi  | Pepsi  |
| Coke   | Shasta | Shasta | Shasta | Coke   |

Construct a frequency and relative frequency distribution table (round the relative frequencies to 2 decimal places):

| Type of cola | Frequency | Relative Frequency |
|--------------|-----------|--------------------|
| Coke         | _____     | _____              |
| Pepsi        | _____     | _____              |
| Shasta       | _____     | _____              |
| Total:       | _____     | _____              |

Construct a bar chart:

Construct a pie chart:

● Question 8

✔ 0/1 pt ↻ 3 ⇌ 19

---

Nikole has surveyed their 30 classmates about the number of cars in their household and received the following data:

|   |   |   |   |   |
|---|---|---|---|---|
| 4 | 4 | 6 | 3 | 6 |
| 6 | 0 | 4 | 1 | 1 |
| 5 | 6 | 2 | 5 | 0 |
| 4 | 5 | 5 | 5 | 3 |
| 6 | 0 | 2 | 1 | 6 |
| 3 | 0 | 2 | 0 | 5 |

Construct a frequency and relative frequency distribution table: (Round relative frequencies to 2 decimal places)

| Number of cars | Frequency | Relative Frequency |
|----------------|-----------|--------------------|
| 0              | _____     | _____              |
| 1              | _____     | _____              |
| 2              | _____     | _____              |
| 3              | _____     | _____              |
| 4              | _____     | _____              |
| 5              | _____     | _____              |
| 6              | _____     | _____              |
| Total:         | _____     | _____              |

Construct a histogram:

● Question 9

0/1 pt 3 19

Mamadou obtained the data from the 35 most recent transaction at the store:

|       |       |       |       |       |
|-------|-------|-------|-------|-------|
| 64.62 | 47.76 | 52.92 | 47.93 | 43.43 |
| 37.06 | 46.76 | 47.13 | 32.52 | 38.57 |
| 48.48 | 52.65 | 27.64 | 43.04 | 61.78 |
| 48.39 | 39.46 | 55.92 | 47.1  | 43.67 |
| 52.68 | 43.26 | 41.51 | 59.89 | 43.93 |
| 37.36 | 49.22 | 47.98 | 51.17 | 45.79 |
| 45.98 | 37.25 | 44.53 | 52.54 | 39.56 |

Use a grouping with the first class' lower limit 15 and the class width of 20 to:

- Create the frequency table:

| Transaction values | Freq |
|--------------------|------|
| ` 15 <= x < 35 `   | 7    |
| ` 35 <= x < 55 `   | 20   |
| ` 55 <= x < 75 `   | 8    |

| Transaction values | Freq |
|--------------------|------|
| ` 20 <= x < 30 `   | 1    |
| ` 30 <= x < 40 `   | 7    |
| ` 40 <= x < 50 `   | 18   |
| ` 50 <= x < 60 `   | 7    |
| ` 60 <= x < 70 `   | 2    |

| Transaction values | Freq |
|--------------------|------|
| ` 15 <= x < 25 `   | 0    |
| ` 25 <= x < 35 `   | 2    |
| ` 35 <= x < 45 `   | 13   |
| ` 45 <= x < 55 `   | 16   |
| ` 55 <= x < 65 `   | 4    |

| Transaction values | Freq |
|--------------------|------|
| ` 15 <= x < 35 `   | 2    |
| ` 35 <= x < 55 `   | 29   |
| ` 55 <= x < 75 `   | 4    |

| Transaction values | Freq |
|--------------------|------|
| ` 20 <= x < 40 `   | 8    |
| ` 40 <= x < 60 `   | 25   |
| ` 60 <= x < 80 `   | 2    |

- Create the frequency histogram:

Identify the shape of the distribution of the data:

### Question 10

0/1 pt 3 19

Connor sampled the ages from the list of the Arizona's millionaires and observed the following data:

|    |    |     |    |    |
|----|----|-----|----|----|
| 70 | 76 | 67  | 68 | 63 |
| 54 | 72 | 42  | 80 | 55 |
| 58 | 69 | 107 | 56 | 60 |
| 48 | 55 | 92  | 77 | 68 |
| 56 | 71 | 66  | 68 | 61 |
| 30 | 71 | 55  | 59 | 60 |
| 48 | 39 | 62  | 89 | 51 |
| 48 | 62 | 63  | 58 | 50 |

Use a grouping with the first class' lower limit 25 and the class width of 10 to:

- Create the frequency table:

| Transaction values | Freq |
|--------------------|------|
| `25 <= x < 35`     | 3    |
| `35 <= x < 45`     | 3    |
| `45 <= x < 55`     | 4    |
| `55 <= x < 65`     | 3    |
| `65 <= x < 75`     | 7    |
| `75 <= x < 85`     | 7    |
| `85 <= x < 95`     | 8    |
| `95 <= x < 105`    | 3    |
| `105 <= x < 115`   | 2    |

| Transaction values | Freq |
|--------------------|------|
| `30 <= x < 50`     | 6    |
| `50 <= x < 70`     | 24   |
| `70 <= x < 90`     | 8    |
| `90 <= x < 110`    | 2    |

| Transaction values | Freq |
|--------------------|------|
| `30 <= x < 40`     | 2    |
| `40 <= x < 50`     | 4    |
| `50 <= x < 60`     | 11   |
| `60 <= x < 70`     | 13   |
| `70 <= x < 80`     | 6    |
| `80 <= x < 90`     | 2    |
| `90 <= x < 100`    | 1    |
| `100 <= x < 110`   | 1    |

| Transaction values | Freq |
|--------------------|------|
| `25 <= x < 45`     | 3    |
| `45 <= x < 65`     | 21   |
| `65 <= x < 85`     | 13   |
| `85 <= x < 105`    | 2    |
| `105 <= x < 125`   | 1    |

| Transaction values | Freq |
|--------------------|------|
| `25 <= x < 35`     | 1    |
| `35 <= x < 45`     | 2    |
| `45 <= x < 55`     | 6    |
| `55 <= x < 65`     | 15   |
| `65 <= x < 75`     | 10   |
| `75 <= x < 85`     | 3    |
| `85 <= x < 95`     | 2    |

| Transaction values | Freq |
|--------------------|------|
| `95 <= x < 105`    | 0    |
| `105 <= x < 115`   | 1    |

- Create the frequency histogram:

- Create the boxplot:

Identify the shape of the distribution of the data:

● Question 11

0/1 pt 3 19

If you are not familiar with Excel, watch the 1st "Help" video before doing this assignment. Skip any advertisements in the videos.

Topic: Emergency Room visits

1. Create an Excel file with the data shown in the 1st 3 columns of this attached file: [04\\_Excel\\_Basics\\_CSmith2\\_2.pdf](#) [+]

2. In the 4th column use Excel's capability to add the numbers in the 2nd and 3rd columns.

For row 2, in cell D2 enter " $=B2+C2$ ". The sum should show up when you press "Enter".

For row 3, in cell D3 enter " $=B3+C3$ ".

Continue this pattern for the rest of the rows.

The 2nd help video shows how to enter an addition formula and how to copy it to other cells.

Your instructor may ask you to insert one or more charts. Follow your instructor's directions.

3. Save your Excel file with the name "Excel\_Basics\_MyName" (Replace "MyName" with your own name, so I can give you credit.)

4. Upload your Excel file in the editor box below. To attach a file:

1. Click the paperclip icon:
2. For the description, enter your file's name
3. In the Link box on the URL line, click the Browse icon at the right end of the line (a magnifying glass on Folder).
  - a. Click the "Choose File" button and select the file from your computer you want to share
  - b. Click the Upload Button
  - c. The filename will appear at the top of the File Manager under "Just Uploaded". Click the file name to select it.
  - d. Click "Insert" to insert your Excel file

6. Click "Submit"

Choose File No file chosen

Your Score will show up after your instructor grades your file. *Do not delete the file from the File Manager or else your instructor will not be able to access it.*

● Question 12

 0/1 pt  3  19

---

Brandon surveyed 35 students and recorded the exact amounts they spent on books last semester:

|        |        |        |        |        |
|--------|--------|--------|--------|--------|
| 167.33 | 170.39 | 124.4  | 171.87 | 165.07 |
| 170.9  | 98.52  | 109.82 | 79.71  | 189.43 |
| 187.74 | 93.46  | 158.78 | 158.31 | 74.32  |
| 172.74 | 91.6   | 170.07 | 210.68 | 146.23 |
| 192.1  | 178.89 | 122.49 | 166.35 | 175.59 |
| 141.87 | 127.04 | 138.98 | 98.47  | 177.96 |
| 157.54 | 182.76 | 175.77 | 149.42 | 118.26 |

Use a grouping with the first class' lower limit 70 and the class width of 20 to:

- Create the frequency table:

| Transaction values | Freq |
|--------------------|------|
| `65 <= x < 85`     | 2    |
| `85 <= x < 105`    | 4    |
| `105 <= x < 125`   | 4    |
| `125 <= x < 145`   | 3    |
| `145 <= x < 165`   | 5    |
| `165 <= x < 185`   | 13   |
| `185 <= x < 205`   | 3    |
| `205 <= x < 225`   | 1    |

| Transaction values | Freq |
|--------------------|------|
| `70 <= x < 95`     | 4    |
| `95 <= x < 120`    | 4    |
| `120 <= x < 145`   | 5    |
| `145 <= x < 170`   | 8    |
| `170 <= x < 195`   | 13   |
| `195 <= x < 220`   | 1    |

| Transaction values | Freq |
|--------------------|------|
| `70 <= x < 90`     | 2    |
| `90 <= x < 110`    | 5    |
| `110 <= x < 130`   | 4    |
| `130 <= x < 150`   | 4    |
| `150 <= x < 170`   | 6    |
| `170 <= x < 190`   | 12   |
| `190 <= x < 210`   | 1    |
| `210 <= x < 230`   | 1    |

| Transaction values | Freq |
|--------------------|------|
| `70 <= x < 90`     | 4    |
| `90 <= x < 110`    | 5    |
| `110 <= x < 130`   | 4    |
| `130 <= x < 150`   | 10   |
| `150 <= x < 170`   | 5    |
| `170 <= x < 190`   | 3    |

| Transaction values | Freq |
|--------------------|------|
| `190 <= x < 210`   | 4    |

| Transaction values | Freq |
|--------------------|------|
| `65 <= x < 90`     | 2    |
| `90 <= x < 115`    | 5    |
| `115 <= x < 140`   | 5    |
| `140 <= x < 165`   | 6    |
| `165 <= x < 190`   | 15   |
| `190 <= x < 215`   | 2    |

- Create the frequency histogram:

Identify the shape of the distribution of the data: Select an answer

Question Help: [Video](#)

● Question 13

0/1 pt 3 19

Makenzie has surveyed their 25 classmates about the number of children under 18 in their household and received the following data:

|   |   |   |   |   |
|---|---|---|---|---|
| 2 | 4 | 0 | 5 | 5 |
| 3 | 2 | 0 | 6 | 1 |
| 4 | 4 | 4 | 1 | 2 |
| 6 | 2 | 3 | 0 | 6 |
| 4 | 3 | 0 | 0 | 2 |

Construct a frequency distribution table:

| Number of children under 18 | Frequency |
|-----------------------------|-----------|
| 0                           | _____     |
| 1                           | _____     |
| 2                           | _____     |
| 3                           | _____     |
| 4                           | _____     |
| 5                           | _____     |
| 6                           | _____     |
| Total:                      | _____     |

### Question 14

0/1 pt 3 19

Hunter has surveyed their 20 classmates about the number of cars in their household and received the following data:

|   |   |   |   |   |
|---|---|---|---|---|
| 0 | 4 | 6 | 6 | 3 |
| 6 | 2 | 6 | 3 | 6 |
| 2 | 4 | 6 | 6 | 1 |
| 1 | 0 | 5 | 2 | 6 |

Construct a cumulative frequency distribution table:

| Number of cars | Frequency | Cumulative Frequency |
|----------------|-----------|----------------------|
| 0              | 2         | _____                |
| 1              | 2         | _____                |
| 2              | 3         | _____                |
| 3              | 2         | _____                |
| 4              | 2         | _____                |
| 5              | 1         | _____                |
| 6              | 8         | _____                |
| Total:         | 20        |                      |

● Question 22

✔ 0/1 pt ↻ 3 ↺ 19

---

The ages for 30 lottery winners was recorded and a frequency distribution of this data is given below:

| Age       | Frequency |
|-----------|-----------|
| `20 - 32` | 3         |
| `33 - 45` | 5         |
| `46 - 58` | 15        |
| `59 - 71` | 2         |
| `72 - 84` | 1         |
| `85 - 97` | 4         |

What is the class width of this distribution?

---

What is the frequency of lottery winners of age between 46 and 58?

---

What is the frequency of lottery winners between the ages of 20 and 45?

---

What is the midpoint of the third class?

---

Rounded to three decimal places, what is the relative frequency of the fourth class?

---

What is the cumulative frequency of the third class?

---

What is the upper class limit of the second class?

---

What is the lower class boundary of the fifth class?

---

| 22.1 | 22.4 | 22.7 | 22.1 | 22.6 |
| 23.5 | 25.9 | 22   | 23.4 | 23.2 |
| 24.4 |      |      |      |      |

1) Complete the stem-and-leaf plot below.

**\*\* You must put commas between the SORTED leaves least to greatest.**

**\*\* Type "DNE" if the leaves don't exist.**

| Stems                | Leaves               |
|----------------------|----------------------|
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |

**Key:** We'll make a key to explain how the stem and leaf plot works, so type 18|0 in this box.

**Key:**  = 18.0

**Answer above → (Shift**

**) for the separator bar with NO Spaces.**

2) What is the SOCS of the data?

a. **Shape:**

b. **Outlier(s):**

c. **Center:**

d. **Spread:**  ←Use a *dash* in your answer with *No Spaces*.

● Question 38

 0/1 pt  3  19

---

Katie recorded her bowling scores over the last 19 games. By looking at her data, she was able to get a better picture of her performances. Make a stem-leaf plot of her bowling scores and answer the questions:

|     |     |     |     |     |
|-----|-----|-----|-----|-----|
| 152 | 135 | 152 | 145 | 130 |
| 154 | 151 | 120 | 142 | 120 |
| 150 | 141 | 143 | 149 | 140 |
| 131 | 141 | 130 | 101 |     |

1) Complete the stem-and-leaf plot below.

**\*\* You must put commas between the *SORTED* leaves least to greatest.**

**\*\* Type "DNE" if the leaves don't exist.**

| Stems                | Leaves               |
|----------------------|----------------------|
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |
| <input type="text"/> | <input type="text"/> |

Key:  = 123

Answer above → (Shift ) for the separator bar with NO Spaces.

2) What is the SOCS of the data?

a. **Shape:** b. **Outlier(s):**  c. **Center:** d. **Spread:**  *←Use a dash in your answer with No Spaces.*Question Help: [Video](#)

## ● Question 39

0/1 pt 3 19

The following data set outlines the scores students had on an Algebra test.

|    |    |    |    |    |
|----|----|----|----|----|
| 29 | 32 | 27 | 30 | 31 |
| 25 | 26 | 34 | 34 | 33 |
| 27 | 28 | 26 | 33 | 25 |
| 33 | 28 | 34 | 34 | 34 |

Draw a dot plot of this data on the graph below.

## ● Question 40

0/1 pt 3 19

The stem and leaf plot below represents the ages in years of family members attending a large family picnic.

Ages:

0 | 3 9  
1 | 0 2 4 8  
2 | 3 5 6  
3 | 2 2 2 5  
4 | 7 7

Key: 2 | 3 means 23 years

Assuming the data represents a population, answer the following.  
Round answers to two decimal places, if necessary:

Mean = \_\_\_\_\_

Median = \_\_\_\_\_

Mode = \_\_\_\_\_

Range = \_\_\_\_\_

Which shape fits the distribution best?

Katie recorded her bowling scores over the last 19 games. By looking at her data, she was able to get a better picture of her performances. Make a stem-leaf plot of her bowling scores and answer the questions:

|     |     |     |     |     |     |
|-----|-----|-----|-----|-----|-----|
| 141 | 147 | 156 | 129 | 137 | 104 |
| 156 | 152 | 141 | 125 | 141 | 141 |

Complete the stem-and-leaf plot below.

- \*\* You must put commas between the **SORTED** leaves least to greatest.
- \*\* Type **"DNE"** if the leaves don't exist.

| Stems       | Leaves      |
|-------------|-------------|
| <div></div> | <div></div> |
| <div></div> | <div></div> |
| <div></div> | <div></div> |
| <div></div> | <div></div> |
| <div></div> | <div></div> |
| <div></div> | <div></div> |

Key:  = 123

Answer above → (Shift ) for the separator bar with NO Spaces.

Question Help: [Video 1](#) [Video 2](#)

The table below gives the number of hours spent watching TV last week by a sample of 24 children. Find the minimum, maximum, range, mean, and standard deviation of the following data using Excel, a calculator or other technology. The minimum, maximum, range should be entered as exact values. Round the mean and standard deviation to two decimals places.

|    |    |    |    |    |    |
|----|----|----|----|----|----|
| 76 | 82 | 59 | 62 | 44 | 42 |
| 56 | 52 | 42 | 86 | 34 | 87 |
| 60 | 69 | 35 | 56 | 81 | 64 |
| 53 | 66 | 38 | 56 | 94 | 19 |

Min = \_\_\_\_\_ Max = \_\_\_\_\_ Range = \_\_\_\_\_

Mean = \_\_\_\_\_ Standard Deviation = \_\_\_\_\_

● Question 43

0/1 pt 3 19

The physical plant at the main campus of a large state university receives daily requests to replace fluorescent lightbulbs. The distribution of the number of daily requests is bell-shaped and has a mean of 52 and a standard deviation of 8. Using the Empirical Rule rule, what is the approximate percentage of lightbulb replacement requests numbering between 44 and 52?

Do not enter the percent symbol.

ans = \_\_\_\_\_ %

● Question 44

0/1 pt 3 19

A survey collected the data below.

| x  |
|----|
| 30 |
| 2  |
| 1  |
| 24 |
| 17 |

The mean is 14.8. Calculate the deviation of  $x=17$ . That is, find  $17-14.8$ .

● Question 45

0/1 pt 3 19

---

We are going to calculate the standard deviation for the following set of data.

1) First, calculate the mean.

$\mu =$  \_\_\_\_\_

2) Fill in the table below. Fill in the differences of each data value from the mean, then the squared differences.

3) Calculate the standard deviation.

| $x$ | $x - \mu$    | $(x - \mu)^2$ |
|-----|--------------|---------------|
| 14  | _____        | _____         |
| 14  | _____        | _____         |
| 14  | _____        | _____         |
| 12  | _____        | _____         |
| 11  | _____        | _____         |
|     | <b>Total</b> | _____         |

Standard deviation:

$\sigma = \sqrt{\frac{\sum (x - \mu)^2}{N}}$  = \_\_\_\_\_ *Round to two decimal places*
